Wyeth

[Date]

Dear [TBD CDC Representative]:

Wyeth is pleased to announce the new Prevnar[®] (Pneumococcal 7-valent Conjugate Vaccine [Diphtheria CRM₁₉₇ Protein]) 0.5 mL prefilled syringe (PFS) delivery system, which will replace the current 0.5 mL single-dose vial. The prefilled syringe will be provided in a package comprised of ten 0.5 mL single dose syringes (no needles will be included).

This new presentation will be available for ordering as soon as the Wyeth inventory of vials is depleted. The new NDC number is 0005-1970-50 and the CPT Code 90669 will remain unchanged.

Below is a comparison of the shipper container for the vials compared to the PFS (**all dimensions are listed in inches**):

Doses/Shipper	Shipper Type	Length	Width	Depth	Volume
875	Vial Shipper	12.81	8.56	11.19	1227.02
450	PFS Shipper	11.56	9.56	15.06	1664.33

Please contact your Prevnar[®] account manager or call Wyeth Customer Service at 1-800-572-8221 if you have questions or need additional information about Prevnar[®].

Please see accompanying Prescribing Information.

Sincerely yours,

W. Matthew Garrett
Vice President & Global Business Manager
